Amendments

In the Claims:

Please cancel claim 71 without prejudice to or disclaimer of the subject matter recited therein.

Please substitute the following claim 39 for the pending claim 39:

39. (Twice Amended) A cartridge for a liquid, which can be connected to a dispensing device, the dispensing device including an upper portion for receiving the cartridge and a lower portion which can be pushed over the cartridge when connected to the dispensing device, the upper portion of the dispensing device being provided with a connection portion for the cartridge and with a dispensing connection portion for drawing off the liquid, the cartridge comprising:

a stiff outer casing including a top portion and a bottom portion, the top portion of the outer casing being coupled to the upper portion of the dispensing device; a container which is stable with respect to shape and which is disposed in the casing; and

a collapsible bag disposed in the container and containing the liquid, wherein the bottom portion of the stiff outer casing is provided with an opening, and

wherein the container includes an opening and a stopper, the stopper including an insertion connection portion which forms a sealingly closing, centered guide means for the dispensing connection portion, and

wherein the stopper is non-releasably connected by the outer casing to the container, and

wherein the cartridge is connected to the connection portion on the upper portion of the dispensing device.

Please substitute the following claim 73 for the pending claim 73:

C2 73. (Twice Amended) A cartridge according to claim 39 for an alcoholic or aqueous liquid, wherein the container and the stopper comprise polypropylene, further comprising a collapsible bag of polyethylene disposed in the container, wherein:

the stiff outer casing comprises a metal, preferably aluminum, or a plastic material, preferably polypropylene;

the opening in the bottom of the stiff outer casing is a bore;

an end of the insertion connection portion is closed by a diaphragm inclined with respect to an axis of the insertion connection portion and the sealingly closing, centered guide means is a press fit and is connected by a snap connection to the container;

the cartridge is releasably connected to the connection portion by means of a releasable plug connection, the releasable plug connection being a snap connection in which there are provided in the connection portion of the upper portion of the

dispensing device snap hooks which engage into a peripherally extending groove in an

upper region of the cartridge;

the bottom of the outer casing includes an inset with a micro-opening
which communicates with the bore in the outer casing; and

an inside of the bottom of the lower portion of the dispensing device is
provided with a resilient piercing device for a sealing foil on an underside of the bottom
of the casing.

Please substitute the following claim 74 for the pending claim 74:

18 74. (Twice Amended) A cartridge according to claim 29 for an alcoholic or
aqueous liquid, wherein the container and the stopper comprise polypropylene, further
comprising a collapsible bag of polyethylene disposed in the container, wherein:

the stiff outer casing comprises a metal, preferably aluminum;

an end of the stopper is closed by a diaphragm which is inclined to an axis
of the insertion connection portion;

the sealingly, closing guide means is in the form of a press fit;

the stopper is non-releasably connected by the outer casing to the
container;

the connection between the cartridge and the connection portion of the
dispensing device is a releasable connection in the form of a snap connection in which
there are hooks provided in the connection portion of the upper portion of the dispensing
device snap hooks which engage into a peripherally extending groove in an upper region
of the cartridge;

an inside of the bottom of the lower portion of the dispensing device is
